Percentile Distribution Report

:

Based on the summary statistics distribution of scores and potential outliers across the different academic and employment metrics.

	sl_no	ssc_p	hsc_p	degree_p	etest_p	mba_p	salary
Mean	108	67.3034	66.33316	66.37019	72.10056	62.27819	288,655.41
Median	108	67	65	66	71	62	265,000.00
Mode	1	62	63	65	60	56.7	300,000.00
Q1:25%	54.5	60.6	60.9	61	60	57.945	240,000.00
Q2:50%	108	67	65	66	71	62	265,000.00
Q3:75%	161.5	75.7	73	72	83.5	66.255	300,000.00
99%	212.86	87	91.86	83.86	97	76.1142	NaN
Q4:100%	215	89.4	97.7	91	98	77.89	940,000.00

Percentile Distribution Report

1. Core Academic Performance (SSC, HSC, Degree)

- **Consistency:** The middle 50% of students (between Q1 and Q3) show a very consistent range, scoring between **60% and 75%** across all three levels.
- **High Achievers (99th Percentile):** There is a significant jump in HSC (Higher Secondary) scores at the top end. While the 75th percentile is **73%**, the 99th percentile hits **91.86%**, showing a small group of elite performers.
- **The Creamy Layer:** The maximum scores (Q4) peak at **89.4%** for SSC, but reach as high as **97.7%** for HSC.

2. Entrance & MBA Performance

- **The "E-Test" Gap:** The E-Test (etest_p) could be presumed as the employability test has the widest spread. The difference between the 25th percentile (**60%**) and the 75th percentile (**83.5%**) is much larger than the MBA grade spread. This suggests the entrance test is better at differentiating candidates than the MBA curriculum itself.
- **MBA close knit range:** The MBA scores (mba_p) are the most tightly grouped, with a median of **62%** and a 99th percentile of only **76.1%**. probably it is harder to "score big" in the MBA segment as per the dataset.

3. Salary Analysis

- **The Median vs. Mean:** The mean salary (288,655) is higher than the median (265,000). This indicates that the data is **right-skewed**—a few very high earners are pulling the average up.
- **Entry Level:** 25% of the candidates earn **240,000** or less.
- **Upper Tier:** 75% of candidates earn **300,000** or less.
- **Outliers:** The jump from the 75th percentile (**300,000**) to the Maximum (**940,000**) is huge. This suggests the 940k figure is a significant candidate for outlier.
